Breeze® SleepGear® Interface Your First Choice in Fit and Comfort.

Breeze SleepGear CPAP Interface

The unique *Breeze SleepGear*® CPAP interface from Puritan Bennett sets new standards in comfort and versatility for sleep apnea patients. Unlike traditional headgear and masks, there are no complicated or confining straps to contend with. The streamlined design contours the head and floats over the face, giving patients the freedom to sleep in virtually any position.

Two-in-One Versatility

The innovative *Breeze SleepGear* lets patients easily switch between the Puritan Bennett Nasal Pillows and *DreamSeal*® mask, so they aren't limited to the same type of interface night after night. The patented Nasal Pillows are available in seven sizes, offering a wide choice in fit. The *DreamSeal* mask comes in three sizes.

Fitting the Breeze SleepGear Interface with Nasal Pillows

For Hard-to-Fit Patients and Every Patient in Between.

Make the *Breeze SleepGear* interface your first choice in headgear for its ability to accommodate a wide range of patients. Simply slide the Nasal Pillows or *DreamSeal* mask assembly into the *Breeze SleepGear* interface, and take advantage of the key adjustment points shown below.

- > New clip (Nasal Pillows only) for patients who want more stability.
- > Multiple adjustments and size options make it easy to get just the right fit.
- > Versatile headgear works with the Nasal Pillows or *DreamSeal* mask.
- > No confining, hard-to-adjust straps.
- > Ultra-quiet exhalation vent.
- > Patients can sleep in virtually any position.

New & Improved Features:

For many years, users of the *Breeze SleepGear* CPAP interface have shared their gratitude for its comfort and performance. They also shared feedback and suggestions that we listened to in adding new features to make the *Breeze SleepGear* interface even better.

- > **Durability**—The hose guide for the Nasal Pillows assembly has an improved design and features a stronger material to ensure greater longevity.
- > **Fit**—A new clip has been added to the Nasal Pillows assembly to give patients greater flexibility in positioning the halo straps for a secure fit.
- > **Comfort**—The cradle pad has thicker padding to increase comfort for a good night's sleep.
- > **Convenience**—A cuff has been added to the swivel adapter for improved convenience.

Sleep Lab Certified

The *Breeze SleepGear* interface offers convenience and efficiency in the sleep lab. When the headgear is applied before the patient falls asleep, it is easy to connect the *DreamSeal* mask or Nasal Pillows assembly for titration with minimal disruption to the patient.

"Having a 'strapless system' for titrations in the labs has reduced the number of lead repairs done during the night, thanks to *Breeze SleepGear*. And CPAP instruction and setups can be done twice as fast due to its simplicity."

— Margaret Smith, RPSGT, CRTT
